Help and Feedback

If you would like to learn more about the new BrightAuthor features described below, please download the [User Guide](#). If you are new to BrightAuthor, you can also visit the [Tutorial Videos](#) page. If you have any questions, please contact us at support@brightsign.biz.

Changes Since 4.1.1.14

Bug Fixes

- MRSS video playback no longer fails if the presentation also contains an HTML state.
- The **Current Active Groups** list in the **Manage > Presentations** tab has been fixed.
- The Presentation Tree View now displays the transition source and target state correctly.

- The Presentation Tree View no longer crashes if a Conditional Target is missing a target state.

Improvements

- The maximum size of HTML sites (and included assets) that can be uploaded to the BrightSign Network has been increased.
- An error message is now displayed if you attempt to upload to BSN a "normal" BrightWall presentation that contains differing amounts of content per screen.
- An error message is now displayed if you attempt to create more than one BrightWall with the same name.
- It is no longer possible to create a BrightWall with an empty **Name** field.
- The **Enable Diagnostic Web Server** box is now checked by default during player setup. This change only applies to first-time BrightAuthor installs.
